SUMMARY

Mobile and frontend developer specializing in Flutter, React.js, and Next.js, focused on building scalable applications for production environments. Experienced in offline-first mobile architecture, Firebase services, payment integrations, and responsive frontend systems. Interested in clean architecture, maintainable state management, and reliable software built for real-world usage.

EXPERIENCE

Kutumba Tech Pvt. Ltd., Kathmandu, Nepal

Oct 2024 – Feb 2026

Software Developer (Flutter & React.js)

- Led end-to-end feature development across production Flutter and React.js applications using modular, scalable architecture.
- Built a Flutter-based logistics platform with order tracking, route management, and real-time delivery status updates.
- Integrated the **eSewa payment gateway**, handling SDK setup, transaction verification, and error-handling flows.
- Implemented secure authentication using **Firebase Authentication and Firestore** across multiple production services.
- Managed state with **BLoC (Flutter)** and **Redux (React.js)**, keeping complex async flows predictable and maintainable.
- Improved rendering performance on mid-range Android devices; delivered responsive UIs across Android and web.

Kutumba Tech Pvt. Ltd., Kathmandu, Nepal

Dec 2023 – Sep 2024

Flutter Developer Intern

- Contributed Flutter modules to live production apps from the first month, ahead of typical intern ramp-up.
- Built reusable Flutter components to reduce UI duplication across projects.
- Integrated Firebase Authentication and REST APIs for production application workflows; participated in code reviews and agile sprints.

EDUCATION

BS in Computer Applications, Tribhuvan University

2020 – 2025

- Coursework: Data Structures and Algorithms, Database Management Systems, Cloud Computing, Computer Architecture

COURSEWORK PROJECTS

TrekMate — Trek Management Platform

2025

- Built a full-stack trek and travel management platform using **Next.js**, **Express.js**, and **TypeScript** with MySQL and Docker.
- Implemented booking management, transportation coordination, destination exploration, and real-time notifications.

MatriNepal — Matrimony Platform

2023

- Built a PHP and MySQL-based matrimony platform with authentication, profile management, match-making workflows, and search functionality.

KEY PROJECTS

Sajilo Khata – Personal Finance Tracker

2026

- Built a Flutter finance application that automatically parses bank SMS messages to track expenses and income.
- Implemented custom parsers for **NIMB, NIC Asia, ADB, Laxmi Sunrise, and Nabil Bank** — each with a distinct message format.
- Integrated **Firestore** cloud sync, FCM push notifications for spending alerts, and offline-first architecture.
- View Project [↗](#)

Nepali Calendar Kit

2026

- Published an **npm package** for Bikram Sambat ↔ AD date conversion with a reusable Nepali Date Picker React component.
- Averaging **4–6 downloads per week** from developers integrating Nepali calendar support into web applications.
- View Project [↗](#)

Streamly – Movie Discovery Platform

2024

- Built a Next.js application powered by the TMDB API with real-time data fetching, dynamic routing, and personalised browsing.
- Reached **1,000+ monthly visits**, 26 GitHub stars, and 7 forks organically.
- View Project [↗](#)

TECHNOLOGIES

Languages: Dart, JavaScript, TypeScript, SQL

Mobile: Flutter, BLoC, Firebase, Firestore, REST APIs, Offline-first Architecture

Frontend: React.js, Redux, Next.js, Tailwind CSS

Tools: Git, GitHub, Figma, Postman, Docker

HACKATHONS

Food Waste Management System

Dec 2024

Boston International College Hackathon

- Led frontend development in a 3-member team; built the UI and real-time analytics dashboard within a 48-hour sprint.

MediServ – Healthcare UI Prototype

2023

HSM IT Club Hackathon

- Co-designed the healthcare service UI prototype in Figma as part of a 4-member team; won **2nd place** in the UI/UX Design category.
