SUMMARY

Flutter and React.js developer with 2+ years of production experience at a Nepali software company. Shipped a live logistics app, integrated eSewa payments, built custom SMS parsers for Nepali banks, and published an npm package with active weekly downloads. Specialises in BLoC state management, offline-first mobile architecture, and software built for Nepal's unique ecosystem.

EXPERIENCE

Software Developer (Flutter & React.js)

Oct 2024 – Feb 2026

Kutumba Tech Pvt. Ltd., Kathmandu, Nepal

- Led end-to-end feature development across multiple production Flutter and React.js apps using modular, scalable architecture.
- Built a full **logistics and delivery app** in Flutter — order tracking, route management, and real-time status updates used in live operations.
- Integrated the **eSewa payment gateway**, handling SDK setup, transaction verification, and full error-handling flows.
- Implemented secure auth using **Firebase Authentication and Firestore** and consumed REST APIs across multiple services.
- Managed state with **BLoC (Flutter)** and **Redux (React.js)**, keeping complex async flows predictable and maintainable.
- Improved app rendering performance on mid-range Android devices; delivered pixel-perfect responsive UIs across Android and web.

Flutter Developer Intern

Dec 2023 – Sep 2024

Kutumba Tech Pvt. Ltd., Kathmandu, Nepal

- Contributed Flutter modules to live production apps from the first month — ahead of typical intern ramp-up.
- Built reusable widget components and responsive layouts, reducing UI duplication across the code-base.
- Integrated Firebase Auth and RESTful APIs for core app features; participated in code reviews and agile sprints.

EDUCATION

Bachelor in Computer Applications (BCA)

2020–2025

Hetauda School of Management and Social Science, Nepal

Academic Projects: TrekMate (8th sem) — Developed the complete frontend in Next.js and Tailwind CSS; collaborated with a backend developer on API design and integration. MatriNepal (4th sem) — PHP-based matrimonial platform for the Nepali community. Library Management System (6th sem) — PHP full-stack system with role-based access.

TECHNOLOGIES

Languages: Dart, JavaScript, SQL
Mobile: Flutter, BLoC, Firebase, Firestore, FCM, eSewa SDK, REST APIs, Offline-first Architecture
Frontend: React.js, Redux, Next.js, Tailwind CSS
Tools: Git, GitHub, Figma, Postman

KEY PROJECTS

Sajilo Khata – Personal Finance Tracker 2026

- A Flutter app that silently parses bank SMS messages to auto-log income and expenses – **zero manual entry**.
- Built custom SMS parsers for **NIMB, NIC Asia, ADB, Laxmi Sunrise, and Nabil Bank**, each with its own unique message format – a genuinely Nepal-specific engineering challenge.
- Spending charts, savings goals with progress tracking, manual editing, and **Firestore cloud sync**.
- FCM push notifications for spending alerts; **offline-first architecture** ensures full functionality without an internet connection.
- Launched April 2026; roadmap includes AI spending insights, BS/AD calendar support, and more bank integrations.
- Link: <https://github.com/ZaddyAI/Sajilo-Khata>

Nepali Calendar Kit 2026

- Published **npm package** for Bikram Sambat (BS) ↔ AD date conversion with a reusable Nepali Date Picker React component.
- Averaging **4–6 downloads per week** from developers integrating Nepali calendar support into web apps.
- Clean API design with full documentation – built for easy adoption without boilerplate.
- Link: <https://nepalicalendarkit.gambhirpoudel.com.np>

Streamly – Movie Discovery Platform 2024

- Next.js app powered by the TMDB API; gained **1,000+ monthly visits**, 26 GitHub stars, and 7 forks organically.
- Real-time data fetching, dynamic routing, and a personalised browsing experience.
- Link: <https://movies.gambhirpoudel.com.np>

HACKATHONS

Food Waste Management System Dec 2023

Boston International College Hackathon

- Led frontend development in a 3-member team; built the UI and real-time analytics dashboard within a 48-hour sprint (Node.js and PostgreSQL backend handled by teammates).

MediServ – Healthcare UI Prototype 2023

HSM IT Club Hackathon

- Co-designed the healthcare service UI prototype in Figma as part of a 4-member team, winning 2nd place in the UI/UX Design category.
